OpenCV Lessons

Although OpenCV is a powerful tool which can be used to develop complex computer vision applications, the documentation of OpenCV is not enough for a newbie to learn OpenCV by himself/herself. And there are few tutorials can be found on OpenCV for beginners in the internet. Therefore, I decided to prepare this tutorial from the very basic concepts of image processing and computer vision using basic inbuilt OpenCV functions. I have tested all given source code in this tute with openCV 2.4.5 and Microsoft Visual Studio Express 2012.

Here is the entire list of lessons

- [What is OpenCV?](#)
- [Installing & Configuring with Visual Studio](#)
- [Basics of OpenCV API](#)
- [Read & Display Image](#)
- [Capture Video from File or Camera](#)
- [Write Image & Video to File](#)
- [Filtering Images](#)
 - [Change Brightness of Image or Video](#)
 - [Change Contrast of Image or Video](#)
 - [Histogram Equalization](#)
 - [Smooth / Blur Images](#)
- [How to Add Trackbar](#)
- [How to Detect Mouse Clicks and Moves](#)
- [Rotate Image & Video](#)
- [Color Detection & Object Tracking](#)
- [Shape Detection & Tracking using Contours](#)

+1 Recommend this on Google

waw it's very usefull for newbe like me...
nice tutorial bro...
keep share!!
i wanna request tutorial face recognition with simple algorithm...

I install vs 2010 express edition and opencv 2.4.5 and configure vs 2010 with your steps but it still error it does not give any header file when i write #include it give me some error.

please help me to fix this problem

Hi,

Thanks a lot for your tutorial. It indeed helped me a lot in understanding the basics. For my own work I need to use pattern matching (using templates), straight edge detection, circle detection, ellipse detection etc and I do them using a commercial computer vision library. I am interested in doing all these stuff using opencv. Can you please highlight any book or website or some tutorial of your own covering this?

Waiting to hear from you soon.
